

# Lesson 11 One Digit Addition

---

## Addition Across

Add the numbers. Put the sum in the blank. The first one has been done for you.

1.  $2 + 5 = \underline{7}$        $8 + 2 = \underline{\quad}$        $5 + 4 = \underline{\quad}$        $8 + 8 = \underline{\quad}$

2.  $2 + 3 = \underline{\quad}$        $4 + 3 = \underline{\quad}$        $6 + 7 = \underline{\quad}$        $7 + 1 = \underline{\quad}$

3.  $1 + 9 = \underline{\quad}$        $0 + 1 = \underline{\quad}$        $8 + 9 = \underline{\quad}$        $5 + 0 = \underline{\quad}$

## Adding Three Numbers

When you add three numbers, choose two of them to add together first. Then add the third number to their sum. For these questions circle the two numbers you added first. Put the sum of the three numbers under the line.

1.  $\begin{array}{r} \textcircled{7} \\ 4 \\ \textcircled{1} \\ \hline 12 \end{array}$        $\begin{array}{r} 1 \\ 7 \\ 8 \\ \hline \end{array}$        $\begin{array}{r} 9 \\ 2 \\ 4 \\ \hline \end{array}$        $\begin{array}{r} 6 \\ 5 \\ 0 \\ \hline \end{array}$        $\begin{array}{r} 2 \\ 8 \\ 3 \\ \hline \end{array}$

2.  $\begin{array}{r} 3 \\ 9 \\ 5 \\ \hline \end{array}$        $\begin{array}{r} 2 \\ 7 \\ 0 \\ \hline \end{array}$        $\begin{array}{r} 4 \\ 8 \\ 3 \\ \hline \end{array}$        $\begin{array}{r} 8 \\ 4 \\ 7 \\ \hline \end{array}$        $\begin{array}{r} 3 \\ 1 \\ 9 \\ \hline \end{array}$

### Teaching Tips

*The first two numbers you add are the ones that are best for you. For each question, think about why you chose the two numbers you did.*

## Word Problems

Read the following problems, then write the equation in the blank.

1. Before 1949, Canada had 9 provinces. When Newfoundland joined confederation that year how many provinces did Canada have?

2. From the story, how many provinces did Canada have in 1873?
